"Reds" and "Blues" — and Other Guys

I couldn't tell this until after the Hempstead county maneuvers were over — because it concerned the secret location of an Army radio interception station that we had been taken to confidentially. But while we were there an argument started which made the mimic warfare of the Second Army's "Blues" and "Reds" take a back seat.

## County Given Quota of 23 in Trade School

Registration Must Be Made Through State Employment Service

Hempstead county has a quota of 23 boys in the new Arkansas Trade School which opened September 1 in Little Rock, according to an official release by the State Department of Education Thursday to Royce Weisenberger, former state representative here, who was instrumental in having the last session of the General Assembly authorize the project.

Other county quotas in southwest Arkansas are:

Howard 12; Lafayette 12; Nevada 14.

The quotas are based on one pre-employment trainee for each 1,444 population or major fraction thereof. Registration began September 1 at the State Employment Service office nearest the applicant's residence.

**To Have Own Building**  
The Trade School is located for the time being in the Shoemaker building, 301 West Markham street, where equipment has been installed. At the permanent location will be in a building to be erected on the grounds of the old Blind School in Little Rock by the WPA.

**Vocational training of defense workers in the following fields of work,"** says the school's announcement, "will be started as soon as all the equipment has been delivered and installed: Machine shop, pattern making, airplane mechanics, drafting, electric motor repair, radio operation, aircraft sheet metal and riveting, aircraft wood work, pipe fitting, electric and acetylene welding. The school will be operated 24 hours a day for vocational education of defense workers during the emergency if there is a sufficient demand.

**6-Hour Class**  
Three six-hour classes will be conducted in each shop from 6 a. m. to noon, 1 p. m. to 7 p. m., and 11 p. m. to 5 a. m. Three-hour courses to give supplementary training for employed mechanics and tradesmen will be held from 7:30 p. m. to 10:30 p. m., according to the present schedule.

"So far as it is possible, trainees will be selected from all counties of the state by the State Employment Service, the Works Progress Administration (WPA), the Civilian Conservation Corps (CCC), and the National Youth Administration (NYA) on the basis of the population of the various counties. Trainees will be selected on the basis of their mechanical experience, previous vocational, or military defense training, and their mechanical aptitude as indicated by aptitude tests given by the State Employment Service.

"Present space and equipment will provide a maximum enrollment of 1,500 to 1,800 in the four shifts. Courses have been approved to operate for 8 to 12 weeks. When the training is completed the trainees will receive certificates, which are recognized in most industrial plants, and their records given to the State Employment Service so that the men may be referred to defense plants for employment when vacancies occur."

**He Was First**  
Frederick the Great was the first German to state that war was a trade without scruples, and that it was right to despise neighbors to make them helpless.

**Cranium Crackers**  
Off to College

College days are with us again as students across the nation start cutting rugs and classes. Among the institutions of learning swinging wide their gates are the following. In what states are they located?

1. West Point, Annapolis and Randolph Field.
  2. Brigham Young University and Leland Stanford University.
  3. Pacific College, College of Pacific and Pacific University.
  4. Vanderbilt University, Vassar College and Villanova.
  5. Queens College, King College and Duke University.

## Government to Remove SPG Cemeteries

Invitation for Bid Issued to Undertaking Firms Thursday

Invitation for bids were issued Thursday to undertaking firms for the removal of graves and stones in 13 cemeteries located on the Southwestern Proving Ground. The contract will be awarded September 15 and all bodies must be removed and re-interred by October 15.

Long a source of considerable anxiety to people whose dead are buried in the plots effected, comfort should be afforded in a large measure from the record of the Government on a similar situation at the Jefferson Proving Ground, Madison, Indiana, where approximately 4,000 bodies were moved. It is a fact verifiable through the files of the War Department that not one complaint or protest was lodged with Officials concerning the removals there. The same representative of the Army who supervised the work in Indiana is on hand at the Southwestern Proving Ground to insure that the local project is handled with the same understanding and consideration.

The new site will be selected by the government after it has met the approval of both the Constructing Quartermaster and the State Board of Health. The Undertaker's bid will then include the price of the site and the removal of stones and markers on all graves, and upon their arrival at the new cemetery all stones will be set in concrete at their proper place on each grave. The new site will be at least the equal or better than the original. The new cemetery will be laid out in the same pattern as the old, walks, drives and boundaries will be duplicated and the relative position of the graves will remain the same.

Should the relatives of a deceased person desire that reinterment be made at some other site than the one selected, upon furnishing the Office of the Constructing Quartermaster with a written statement that they have the right to bury such person in some other site, the government will then pay all transportation costs to any point within a reasonable distance. There must be furnished, however, a notarized statement from all equally near of kin that there is no objection to removal to the site in question.

If certain cemeteries do not desire bodies removed at all, then upon the furnishing of a notarized statement of all equally near of kin of all persons buried in the cemetery to the effect that they do not desire the cemetery moved, no action will be taken. This action must be accompanied by a fully signed release of all rights to the bodies.

Officials in charge of removals desire it made known that the Government fully realizes the amount of sentiment and the responsibility resting upon it, and assure all concerned that the Government will adequately supervise every phase of the work.

## Final Rites for Henry Taylor

Funeral Services for Local Man Held Thursday

Funeral services for Henry Taylor, Sr., well-known Hope insurance man, killed in an automobile accident near Harrison last Tuesday afternoon, were held Thursday morning at 10:30 at the family home on South Pine street.

He is survived by his wife, three sons, Lane of Marked Tree, Frederick, with the army in Nome, Alaska, and Henry Taylor, Jr., of Hope, five brothers, Neede of Bradley, Ronnie of Magnolia, Charles of McKame, Curtis of Horseshoe, Texas and J. E. Taylor of Little Rock, Ark.

## Joe Sutton Visitor at The Star Office

Joe Sutton former advertising manager of The Star, was a visitor at the newspaper office Wednesday night. Mr. Sutton, now with the headquarters of the Second Army, Memphis, was with newspapers at McAllen, Austin, Texas, and at Shreveport, before entering the Army.

**Incomplete Census**  
The ninth census of the United States in 1870 was incomplete in the southern states, but showed the country had a population of 38,558,371.

Novgorod was the first capital of the state of Old Russia.

## Air Superiority May Decide Leningrad Fate

Air Fight Rages as Reports Indicate Deadlock of Land Forces

By the Associated Press  
The battle of Russia is surging toward a climax in the four principal sectors of the south and of the main Russian German front, on the immediate approaches to Leningrad, on the front west of Moscow, and on railways and highways near Kiev and on the seigniorings around Odessa.

Russians said the assault on Leningrad, now threatened by victorious Finnish troops, had been checked but Pravda, Communist party organ, admitted that the "hostile enemy is breaking through on approaches" to Russia's second largest city.

Inhabitants of Leningrad have turned out to build defense lines to meet their foe and they are determined, it was said, to turn the approaches into graveyards for the attackers.

**15,000 Nazis Dead**  
Fighting has started on the approach to Kiev, Ukraine capital, with the Russians declaring the Germans repulsed by counter attacks in one outlying village and said several German regiments sustained losses of more than 15,000 men in dead and wounded.

Somewhere on the indefinite front west of Moscow the Russians claimed their deepest counter thrust while the Red fleet was attempting to relieve the defenders of Odessa by landing storm troops behind the German-Rumanian siege lines.

The German radio appealed to the people Thursday to forge a complete and detailed description of military operations.

**Radio Appeal to Nazis**  
"The people know only too well why lack of information is necessary, but they are also aware of the fact that each time a campaign has been completed a detail report is given," the radio said.

The German and Russian high commands matched each other in secretiveness on the course of the war while Finnish comrades in arms with the Nazis indicated that the defenders of Leningrad were being squeezed into pivotal struggle for possession of the city.

Hiller's headquarters said "operations continue on schedule."

Said the Red army, "Fighting continued along the entire front during the night."

The language of the notices by the fact that they frequently silent on developments might be taken to indicate that a German-Russian deadlock had been reached and that the vast battle line had been stabilized for the present at least.

Russian dispatches, not with full authority of the high command, insisted that the German thrust on Leningrad had been checked and indicated that the Red airforce and the Luftwaffe were waging a battle for control of the air over the city.

## Bargains in Cotton Goods

Housewives Should Help Promote Cotton Materials

Rural homemakers with cotton stamps to spend and other thrifty housewives looking for good bargains, should find them on the cotton piece goods counter during the September sales, says Miss Mary Claude Fletcher, county home demonstration agent.

Cottons, Miss Fletcher, points out, are used more than any other textile. They are especially adaptable for men's work clothing, house dresses, children's play and school clothing, and for household articles such as sheets, pillow cases, towels, slip cover and so forth.

Standard colors and designs in piece goods may be purchased now for next summer's wardrobe, or the material may even be made up for the first days of school this fall, the county home demonstration agent says.

Even in the purchase of cottons, however, Miss Fletcher advises, careful reading of labels is necessary in the "best buys" are to be made.

For the homemaker interested in stretching the clothing dollar, Miss Fletcher recommends the following tips for cotton shoppers prepared by Miss Sue Marshall, Extension clothing specialist, University of Arkansas College of Agriculture.

## A Thought

Set thine house in order.—11 Kings 20:1.

## Reds Take Offensive Against Nazis

The Russian armies of the center and the south appeared to be stopping up the momentum of their counter-attacks against the Germans. This map shows the location of the reported Russian counter-attacks.

## Melon Reaches Senator Spencer

Colleagues Invited to Help Eat 138-Pounder

WASHINGTON—(P)—Senator Spencer (D. Ark.) invited a group of his colleagues to lunch Thursday with a 138-pound watermelon from his home town, Hope, as the principal delicacy.

Grown by J. A. Porterfield of Hope, the melon was delivered in Washington by a group of the senator's friends.

Vice President Wallace had the honor of cutting the melon. Among other guests invited was Majority Leader Barkley (D. Ky.).

Luncheon was in the senate secretary's private dining room.

## How to Spot a Smart Child

Many Children Act Differently With Training

By ADELAIDE KERR  
AP Feature Service Writer  
NEW YORK—For a closeup look at how gifted children act while getting special training, come along to class 6b-7a of New York City's Public School 208, busy on "The Influence of Africa on Civilization."

Herbert, chairman of the study committee, has partitioned out their tasks. Two earnest little girls bend over books, looking up the history of the Rosetta Stone. A sturdy blond lad is drawing blackboard illustrations which he will use in his hieroglyphics report to the class. Others are writing up notes at their desks.

Next day they will make their reports to the class, which will use it in writing the illustrated books that each child must prepare on the unit of work.

"The things they say make even my jaw drop sometimes," their teacher says. "At the end of the day I'm good and tired, but it's the kind of tiredness you feel after a good party."

And how do the children feel about it? Even the ones who used to be truants "can't be tied at home" now.

**Parents Are Enthusiastic**  
Parents of Public School 208's gifted children are enthusiastic too. So enthusiastic that they contribute \$2.50 apiece a month—or more—to pay for the art instructors. And they turn out in mass at parent-teachers meetings. Mothers give their time to keeping records; one father takes care of the

(Continued on page three)

## 300 Expected at Club Meet

Hempstead Home Demonstration to Be Represented

Hempstead county home demonstration club members will be represented at the 13th annual meeting of the Arkansas Council of Home Demonstration Clubs to be held in Little Rock September 3 to 6 by Mrs. Shirley Stewart, Mrs. H. H. Huskey and Mrs. Andrew Powell, according to Miss Mary Claude Fletcher, county home demonstration agent and Miss Phoebe Harris, assistant home demonstration agent. The agents will attend the meeting with the Home Demonstration Club executive officers.

The Council meeting, which will be held at the State School for the Blind and Deaf, will be attended by 300 state club and membership and approximately 50 home demonstration club members who will participate on the program.

Theme of the meeting will be "The Rural Woman's Part in National Defense."

Guest speakers for the Council meeting will include Mrs. Caroline King, woman's editor, Country Gentleman, Philadelphia; Governor Homer M. Adkins, Little Rock; Dr. A. M. Harding, President of the University of Arkansas, Fayetteville; and Aubrey D. Gates, assistant Extension director, Little Rock.

Among the features of the program will be a brief review of the development of the home demonstration council program from year to year by Miss Connie J. Bonagel, state home demonstration agent; and the former Council Presidents; the annual address by the Council President, at present, Mrs. R. C. Harville, Babelvale; a panel discussion on the contribution rural women can make to the defense program through their home demonstration clubs; and a discussion of flag etiquette by Mrs. Sally Ogilvie, Harmony, state citizenship chairman.

Recreation and entertainment features of the program will include a lawn party, colored slides, a dulcimer solo, one-act plays, choral music, folklore acts, a "family fun" demonstration, and a patriotic pageant. Between-sessions attractions will include a fun center featuring home-made homes, nutrition for health, and state home demonstration club camp scrap books.

Official business to be transacted at the meeting includes the biennial election and installation of officers, reports of the members of the Ex-

(Continued on Page Three)

## Army Begins Withdrawal

75,000 Troops to Move Into Louisiana Area

By JERRY T. BAULCH  
WITH THE ARMY IN ARKANSAS  
—(P)—75,000 men of the 7th corps moved their headquarters on the west shore of the Ouachita river and began a 200-mile race Thursday toward central Louisiana to escape a ring of infantry, cavalry and armored troops rapidly forming around them in the war games.

To the north the New York 27th Division abandoned a 3-day stand north of Camden and leaving a small force withdrew to Snackover. Even the suicide detachment fled from Camden Wednesday night as the whole force shifted toward El Dorado.

The 35th Division (Kansas, Missouri, Nebraska) moved into Louisiana a day ahead of the 27th leaving to the New Yorkers to build a defense against the Kotnik Second Cavalry Division from Ft. Riley, massed eastward on the Ouachita.

The 33rd Division remained in the Haynesville-Homer area in Louisiana, facing west for an expected attack by the first armored division now speeding from Ft. Knox to cut off the flight.

With 3 divisions under Major-General Robert C. Richardson attempting to reach safety south of the Red river (Major General Ridley moved his Kotnik army in pursuit. Infantry men led the way southward. The move was to continue most of the day. With miles of swampland separating Gen. Ridley's infantry force from his cavalry the 12,000 men of Major-General Milliken, impatiently awaited permission to strike westward.

One out of every 30 draftees was rejected for any service whatsoever because of subnormal eyesight.

## Churchill, King Want More Aid to Fight Nazis

Asserts Britain Is One Obstacle in Way of Attack on New World

LONDON—(AP)—Prime Minister Churchill of Britain and Premier W. L. Mackenzie King of Canada both called Thursday in diplomatic but firm words for full cooperation of the United States in the fight against the Nazis.

Addressing a luncheon Churchill said:

"No lasting or permanent solution of difficulties with which we are now confronted—with which the whole world is confronted—no diversion of that sad fate which confronts us can be achieved without the full cooperation in every field of all nations which, as yet, lie outside the range of conquering power."

King linked his statement with Churchill saying:

"Brings Up Pledge  
Your declaration, Mr. Prime Minister, that in the Far East Britain would stand at the side of the United States is a sure sign of deepening independence of the free world."

"A similar declaration on the part of the United States as respects to the Nazi government would shorten the conflict."

"Such a declaration would be full of meaning for the German people and at some time it would constitute realistic recognition that Britain is the one obstacle in the way of the Nazi attack on the new world."

**U. S. Aid Atlantic Problem**  
Before he made the reference to the Far East pledge, King said it was the best of news when the United States took a share in keeping open the North Atlantic across the Atlantic to Britain and added:

"We in Canada were greatly heartened when three years ago the president after declaring Canada as a part of the sisterhood of the British Empire declared the people of the U. S. would not stand idly by if our native soil was threatened."

## Dress Children for School

Junior Should Be Allowed to Pick Own Clothes

With school bells in the offing, Miss Mary Claude Fletcher, county home demonstration agent, points out to rural homemakers that it will take much more than teaching reading, "rithmetic" and "handicraft" to help Junior pass to the second grade next spring.

The progress of young Junior and Sue in their first year of school will depend to a large extent upon their attitude, whether or not they are glad to hear the school bell ring, the home demonstration agent says.

In this regard, Mrs. Ida A. Fenton, of the University of Arkansas College of Agriculture, advises that a home program should begin now to sell the beginners on the idea of being away from home all day, eating a lunch from a lunch box, and being vaccinated.

A wise parent, the Extension economist in home management says, will plan to take the beginner to town to do his own school shopping. This should be a great event in the youngster's life, and should be well planned with care given to listing his needs. This list should include a lunch box, waxed paper, napkins, pencils, and tablet and book satchel. And the beginner's purse should contain enough cash to pay for all of these articles.

The timid child, to get off to a good start, is going to need all the mental poise that can be accumulated, backed up by the knowledge that he can do many of the things the other children do.

If the beginner is to welcome the hunk of the bus and the ring of the school bell, Mrs. Fenton says, he must be prepared, mentally and physically, for the first day of school.

## American Legion to Meet Thursday Night

All members of the American Legion and visiting legionnaires are asked to meet at the city hall Thursday night at 8 o'clock. Important business will be discussed at the meeting. All members are urged to be present.

**About the Octopus**  
The nerve center of the octopus is in its eyes. For centuries, native Hawaiians have killed these creatures by piercing their eyes, knowing that this causes quick death.

## Milk Demands Cause High Cattle Price

### Dairy Farmers Faced With Necessity of Raising Own Stock

Because of the increased demand for milk resulting from the national defense program, good dairy cattle are going to be scarce and high in price, according to information received by Oliver L. Adams, county agent, from Paul Carruth of the University of Arkansas college of Agriculture. "Consequently," Mr. Carruth said, "dairy farmers are faced with the necessity of raising good young stock regardless of price."

The extension dairyman urged farmers to give more attention to raising dairy heifer calves from two months of age until they freshen for the first time. The amount of milk required to raise a heifer may look expensive, in view of the demand for milk, but "it will pay off when the heifer comes into production," he declared.

Heifers should be fed so that they will make good gains and obtain full size before calving. The dairyman pointed out that an under-sized cow, because of its limited capacity to consume and digest food, cannot compete with a larger cow in milk production even though she has the same inherited ability to produce milk.

Mr. Carruth said the dairy farmers are sometimes negligent in feeding their heifer calves, and pointed out that "the more feed used in growing heifers, the more milk they will give when they freshen."

Because of the threatened shortage of dairy cows, the dairyman urged dairy farmers to plan now to grow all replacement stock and some for sale.

### Blevins

Mr. and Mrs. Clifton Harris returned to their home in Little Rock Sunday after spending part of their vacation here.

Mr. and Mrs. Harold Huskey and children, and Miss Christene McDougald of Arp, Texas, spent Sunday and Monday here visiting relatives and friends.

Mr. and Mrs. M. T. Ward had as week-end guests Misses Marie Ward and Norma Eley of Arkadelphia and T. C. Knapp of Little Rock.

Mrs. Annie Lee Savage of Bastrop, La., was the guest of her parents, Mr. and Mrs. Joe Bailey last week.

Friends of Mrs. J. J. Foster will be glad to know that she is doing nicely after a major operation in a Prescott hospital last week.

Bishop and Mrs. W. C. Martin and daughter, Mary Catherine of Omaha, Neb., were the Sunday guests of Mr. and Mrs. M. L. Nelson.

Austin Hendrix of Camp Walters, Texas, spent the week-end here with his parents, Mr. and Mrs. T. W. Hendrix.

Mrs. Joe Britt and son of Birmingham, Ala., are guests of relatives here.

Mr. and Mrs. J. W. Smith and daughters of Okay, were week-end guests of Mr. and Mrs. W. P. Brunson and Martha.

Miss Ora Gorham of Arkadelphia spent the week-end here with home folks.

Mr. and Mrs. Olin England and son, of Tyler, Texas, were week-end guests of Mr. and Mrs. W. C. Brown.

Mr. and Mrs. A. H. Wade and daughter, Jane, returned to their home in Little Rock Monday after a week's visit here with relatives and friends.

Mr. and Mrs. L. S. Shackelford and sons were Saturday night and Sunday guests of Mr. and Mrs. Guy Nivens in Longview, Texas.

Mrs. W. C. Brown and Mrs. I. C. Taylor and Miss Cledith Taylor spent Wednesday in Nashville visiting relatives.

C. W. Leverett made a business trip to Little Rock Friday of last week.

Guy Brooks of Tucson, Ariz., is the guest of his parents, Mr. and Mrs. A. J. Brooks.

### Mind Your Manners

Test your knowledge of correct social usage by answering the following questions, then checking against the authoritative answers below:

1. Should a child be allowed to sass a grown-up without being reprimanded simply because there are guests and the parents do not want to correct him in front of guests?

2. If a child is rude to a grown-up or to another child, should he be made to apologize?

3. Is it good manners to tell a young mother who is feeding a child according to her doctor's orders that you don't approve of modern methods of child feeding?

4. Does a person of charm talk about how much nicer manners young folks used to have than they have now?

5. Should one resist the impulse to make fun of an absent person even if he knows his comments will get a laugh?

What would you do if—

You find out your child misbehaved at a children's party—

(a) Say nothing about it to the mother of the child who gave the party?

(b) Apologize to the mother of the child who gave the party?

Answers—

1. No. If necessary he should be sent from the room.

2. Yes.

3. No.

4. No.

5. Yes. It is easy to be funny at another's expense.

Best "What Would You Do" solution—(b).

New Officers Are Elected by Children of the Confederacy  
The Clara Lowthorpe chapter of the Children of the Confederacy met at the home of Miss Rosalyn Hall Wednesday afternoon with Miss Patsy Ann Campbell, vice-president, Miss Rose Marie Hendrix, secretary, Miss Mary Ross McFadden, co-hostesses.

A salute to the Confederate flag opened the meeting with the business session following. Mrs. H. C. Whitworth, director of the group, announced that the chapter would assist in the "Bundles for Britain" campaign. Miss Nell Jean Byers and Miss Rose Marie Hendrix will receive all contributions to be sent to the New York office.

Following is a list of officers selected by the nominating committee for the coming year: president, Miss Patsy Ann Campbell; vice-president, Miss Rose Marie Hendrix; secretary, Miss Mary Ross McFadden; treasurer, Miss Ophelia Hamilton; program chairman, Miss Frances Harrell; custodian of flags, Miss Rosalyn Hall; and historian, Miss Peggy McNeil.

As the opening part on the program for the afternoon, Miss Mary Joe Monroe gave the history of the Clara Lowthorpe chapter. The American Creed, prepared by the late John D. Rockefeller, was read by Miss Barbara Walker.

After the program a social hour was enjoyed. The hostesses served "Cokes" and sandwiches.

Mrs. E. P. Stewart has Two Tables at Tuesday Club Meet  
Mrs. L. W. Young and Mrs. A. J. Neighbors were the high scorers at the meeting of the Tuesday Contract club at the home of Mrs. E. P. Stewart on North Hervey street.

Artistically arranged in the card rooms were early fall flowers in rust shades. Two tables were arranged for the club members and one visitor, Mrs. M. M. McLaughlin.

After the spirited games the hostess served a delightful salad course.

## Personal Mention

Mrs. George Ware returned home this week from a pleasant vacation visit with relatives and friends in Pine Bluff and Mississippi points.

Miss Marilyn McRae has been

New under-arm  
**Cream Deodorant**

## OUT OUR WAY

A HOUSEHOLD NECESSITY

J.R. WILLIAMS

spending the week with friends in Little Rock. On Sunday she leaves for Conway to matriculate at Hendrix college.

Miss Claudia Agee will be among the Hope students at Henderson College, Arkadelphia, this year. She will be a freshman.

Listed among the candidates for the B. A. degree at Southwestern in Memphis was Mrs. Carl Ray, nee Charlotte Agee. The Rays will arrive soon for a visit with her parents, Mr. and Mrs. Claude Agee.

Mr. and Mrs. Lee W. West have recently moved to the city from Texarkana to make their home. They are domiciled at 212 North McIne street.

Miss Virginia Dell Cassidy left this week for Shreveport to enter nurses training at the Tri-State hospital.

Miss Enola Alexander is leaving Sunday for her senior year at the University of Arkansas.

Mrs. A. J. Payne of Little Rock has been the guest this week of her sister, Mrs. C. C. Lewis, and Mr. Lewis.

Hope will be represented at Monticello A. and M. this year by Marie Antonette Williams. She departs Saturday.

Thomas Kinser left Wednesday for Fayetteville to enter the University of Arkansas. Thomas will play with the Varsity club orchestra this year.

Mrs. Ched Hall and daughter, Rosalyn, are going to El Dorado Friday to visit the Byron Winns for the week-end.

Miss Fay Davis returned to her home in Clarksville after spending the week with Miss Ophelia Hamilton. Miss Davis, who was a member of the Hope high school faculty last year, will teach at Clarksville.

Miss Kathleen Cooper of Houston was the guest this week of her parents, Mr. and Mrs. R. E. Cooper.

Mr. and Mrs. Carl Jones and Mr. and Mrs. J. W. Franks were Wednesday visitors to Texarkana.

Mr. and Mrs. Dale Barnum and sons, Howard and Dale, of Tyler, Texas were week-end guests of friends in the city.

Mrs. Sam Warnack has returned from a visit with relatives and friends in St. Louis and Memphis.

Mrs. T. A. Hendrix and daughters, Martha Ann and Gertrude, left Wednesday morning for Sacramento, Calif., for a visit with Mrs. Hendrix's son, Roy Hendrix, who is in the U. S. army Air corps at Mather Field as an aviation mechanic.

## Oat Planting Means Much

Best Method of Seeding Is With Drill, Agent Says

The manner in which oats and other small grains are planted is often the difference between success and failure, declares Oliver L. Adams, county agent.

Results of many years of work by the University of Arkansas College of Agriculture and experiences of farmers show that the best method of seeding is with a drill. Drilling the seed has three advantages, points out Charles F. Simmons, Extension agronomist. (1) The seed is firm into the seedbed, which enables the plant to take advantage of soil moisture, and protects the plant roots against freezes; (2) the seed are put down at a uniform depth, and (3) the seed are planted at a uniform rate. Uniform depth and rate ensure a uniform stand. When the drill is used, the drill furrow should be left open to offer protection against freezing.

Where small grain is planted on lospezoza stubble and complete seedbed preparation may reduce the possibility of getting a volunteer stand of lospezoza, the lospezoza stubble may be disked, followed by drilling or by broadcasting and the seed disked in. However, one of the most successful methods of seeding oats on lospezoza stubble is the use of a special type planter known as a corrugated seeder which plants the seed without destroying the lospezoza.

Where oats are drilled early, the recommended rate of seeding is 7 weeks per acre. With broadcast plantings or late plantings about 10 pecks per acre is recommended.

Since the resistance to winterkilling and the value for winter pasture are largely dependent on the amount of fall growth, fertilizer applied before seeding to increase the growth is recommended over most of the state. Where soils are especially low in nitrogen, 200 to 300 pounds of a 4-12-4 fertilizer or 6-12-6 fertilizer per acre are recommended. On other soils 200 to 300 pounds of 20 per cent superphosphate and 20 to 25 pounds of muriate of potash per acre applied before planting is advised. On most soils a top-dressing with 100 to 200 pounds per acre of a nitrogen fertilizer about the first of March will be profitable.

Miss Kathleen Cooper of Houston was the guest this week of her parents, Mr. and Mrs. R. E. Cooper.

Mr. and Mrs. Carl Jones and Mr. and Mrs. J. W. Franks were Wednesday visitors to Texarkana.

Mr. and Mrs. Dale Barnum and sons, Howard and Dale, of Tyler, Texas were week-end guests of friends in the city.

Mrs. Sam Warnack has returned from a visit with relatives and friends in St. Louis and Memphis.

Mrs. T. A. Hendrix and daughters, Martha Ann and Gertrude, left Wednesday morning for Sacramento, Calif., for a visit with Mrs. Hendrix's son, Roy Hendrix, who is in the U. S. army Air corps at Mather Field as an aviation mechanic.

## Russo-German Battle Bloody

British Sources Believe Russians Will Hold

LONDON—(AP)—Authoritative British sources said Thursday that German losses this far in the conflict with Russia totaled 1,750,000 and that Russian losses were from 2 to 3 million in the bloodiest fighting in history.

This source said none could over-estimate the Russian conduct of the war. He asserted that the British already are sending the Russians airplanes as "we can spare them and all the rubber they can use."

The source said the Russians were already discussing the campaigns of next spring and August and said the British were confident that they will hold out through the winter.

The Russians now have 9,000,000 troops in action and soon will be ready to put 4,000,000 more in the field, and have no need for outside forces.

disagree on a number of points. Besides their divergence of opinion on "What is a gifted child?", they differ on how his special education should be handled. Some think it should be done in special classes or schools for the gifted. Others believe the gifted should be given extra work in their regular grades.

How is the gifted child selected? While educators generally agree that he should score an IQ of at least 130 on some scale like the Binet-Simon test, they also believe choice should not be made on that basis alone. Too many other factors—such as character and the ability to get on with people—are important in anybody's life.

Children in the intellectually gifted classes in New York public schools are selected on the basis of the Binet-Simon test, plus high educational achievement in all subjects, with emphasis on reading ability. Dr. Marian Pritchard of Columbia Teachers College, who assisted in the Speyer School experiment, reports that the school's gifted children were judged on three points: (1) native intelligence, (2) character traits such as perseverance, patience, industry, honesty and ability to get on with others and (3) physical stamina, development and health.

**Finding Teachers a Problem**  
Finding the right teachers presents one of the greatest problems in specialized education of gifted children. Teaching high IQ's requires fast thinking, a fund of varied knowledge, sympathy and tact. Teachers doesn't have to drag high IQ's along the path of knowledge, but she may have to run pretty fast to keep up. Dr. Benjamin B. Greenberg, Assistant Superintendent of Schools of New York City, says that teachers of intellectually gifted classes in the five boroughs are selected from the regular teaching ranks on the basis of their personal qualifications.

Since the movement for special education of gifted children is still in its infancy, educators can't yet point to conclusive adult results as an outcome. The youngsters handled in the last decade aren't old enough to produce anything of real value yet. But records are being kept in a number of schools and eventually they will contain an interesting story.

No one knows now just where the movement's future will lead. But its supporters say "It's expanding and it seems a movement which is likely to succeed." At a result of it in the near future America may be able to make greater use of its genius.

Executive Committee of the State Council and of the Preparedness, the 4-H Club, the Red Cross and the hands across-the-sea committees.

Final feature of the Council program will be a tour of the State's three capitals and of Camp Joseph T. Robinson. The tour will be held Saturday morning, September 6, just prior to the departure of the delegates for home.

When a person is angry or afraid his sight is temporarily deranged, according to the Better Vision Institute.

## Now Is Time to Clean Farms of Sprouts

Cutting of Competing Growth Now Delivers Shock to Roots

Hempstead county farmers who planted forest trees this spring on their farms in keeping with good land-use practices will find that now is the best time to clean their plantations. Oliver L. Adams, county agent, said.

This is supposed to be the best time to clean plantations because the cutting of competing growth will deliver a serious shock to its root system.

Cleaning, he explained, is simply removing the competing growth, such as prairiegrass, sassafras, and sumac, from the plantation.

A plantation needs cleaning, according to Frederick J. Shulley, of the University of Arkansas College of Agriculture, when the tops of the planted trees are not in the clean and competing growth extends above them.

The Extension forester said that if the competing growth is not too heavy it can remain in the plantation where it falls. But if the growth is heavy it is advisable to pull it out of the plantation.

Mr. Shulley said that the forest tree plantations that were made over the state this year have had a very high survival of trees, and that the trees have made a reasonable height growth, because of the protection and care given the seedlings in their establishment. Cleaning he said, will ensure even better plantations from the standpoint of survival and growth.

Among Hempstead county farmers making forestry plantings this fall are H. H. Derryberry, Washington; E. E. Jackson, Putnam; W. B. Nelson, Washington; J. M. Arnold, DeAnn, and Finis Collins and Warren Butler, 4-H club boys at Spring Hill.

## Favors Lower Tax Exemption

Senate Approves Proposal to Reduce Income Tax Level

WASHINGTON—(AP)—The Senate approved Thursday 43 to 23 a proposal to broaden the tax base and raise about 302 million dollars in new revenues by lowering existing income tax exemptions from \$2,000 to \$1,500 for married couples and from \$800 to \$700 for single persons.

The latest estimate shows that the change recommended by the Senate Finance Committee would bring 4,911,000 more persons under the income tax structure.

The house retained exemptions at the present levels and whether the exemption to lower will be enacted will depend largely on a joint conference committee which will be named to adjust the differences.

## The "United States"

There is more than one "United States" in the world. Others are the United States of Mexico, United States of Colombia and the United States of Brazil.

About 72 per cent of Missouri highway travel is for business purposes and less than 28 per cent for pleasure and recreation, a recent survey indicated.

Mr. Shulley said that the forest tree plantations that were made over the state this year have had a very high survival of trees, and that the trees have made a reasonable height growth, because of the protection and care given the seedlings in their establishment. Cleaning he said, will ensure even better plantations from the standpoint of survival and growth.

Among Hempstead county farmers making forestry plantings this fall are H. H. Derryberry, Washington; E. E. Jackson, Putnam; W. B. Nelson, Washington; J. M. Arnold, DeAnn, and Finis Collins and Warren Butler, 4-H club boys at Spring Hill.

Answer to Cranium Crackers

- Questions on Page One
1. West Point is in New York, Annapolis in Maryland, Randolph Field (U. S. flying school) in Texas.
  2. Brigham Young U. is in Utah, Stanford is in California.
  3. Pacific College is in Newberg, Ore., College of Pacific is at Stockton, Calif.; Pacific University is at Forest Grove, Ore.
  4. Vanderbilt is in Tennessee, Vassar is in New York, Villanova is in Pennsylvania.
  5. Queens is in New York and North Carolina, King in Tennessee, and Duke is in North Carolina.

Clubs

**Oak Grove**

The Oak Grove Club met at the home of Mrs. Harvey Allen for their August meeting.

The meeting was called to order by the President. The club sang the song of the month-song, "Columbia the Gem of the Ocean."

The roll call was answered—my hobby and how I enjoy it. There were ten members present and one visitor. The devotionals were led by the hostess. Plans were made for the fair. The home management leader was in charge of the meeting. She gave a demonstration on bed spreads made of sacks, and also hair curlers made from inner tube.

The recreation hour was really enjoyed by everyone. Prize winners, Mrs. Fred Camp and Miss Lois Purcell. Then the hostess invited the club to the dining room where the table was filled with refreshments.

**Some History**

A single strain of blow flies has been raised for 200 generations for experimental purposes at Ohio State University. This would be equivalent to a family history of 4000 years on the human scale.

## U. S. Army to Be Ready

Gas Masks Given Tests in Southwest Maneuvers

By RALPH MARTIN  
NEA Special Correspondent  
WITH THE THIRD ARMY IN LOUISIANA — Chemical warfare officers have a healthy respect for the army mule.

The use of training gases in the giant war maneuvers in the area of south Arkansas, west Louisiana, and east Texas has shown again that army mules and cavalry horses took much more readily to gas defenses than do soldiers.

"The army mule and cavalry horse have enough sense to keep their mouths shut when gas has been laid

## OUR BOARDING HOUSE

with . . . Major Hoople

down," snarl weary chemical warfare men in explanation.

Toxic lacrymatory gases rarely bother the war animals. The horse and mule breathe only through their nostrils—and for this reason the mask for them is merely an impregnated cloth bag, covering only their nostrils.

Gas masks for men must be more elaborate, covering the entire face. The service mask is a marvelous mechanism developed in army laboratories at the Edgewood Arsenal in Maryland. It provides protection against the known war gases because air is drawn through a canister, containing filters, through a carrier, and into the nostrils through an air-tight

## Edson in Washington

Defense Layoffs May Jolt Jobless Fund

WASHINGTON — President Roosevelt's announcement that state unemployment insurance funds might have to tide workers over periods of idleness in the transition of industry from civilian to defense production is the tip-off that this emergency will give the whole unemployment compensation plan its first major test.

As many as 5000 plants working on non-defense orders may be forced out of business because of inability to secure priority on materials.

That means, according to American Federation of Labor estimates, that anywhere from one to two million workers will have to find new jobs in defense industries or a good many of them may have to rely for a time on their jobless insurance.

In making his statement about reliance on unemployment compensation, the President made clear that every effort would be taken to provide a 60-day leeway before any factory was actually closed down by material shortages. In that time, new jobs in defense industries may be found, or plans made to give workers retraining courses which will fit them for defense jobs. It is only when these shifts fail to produce results that unemployment insurance will have to carry the load.

**Attack Big Reserves**  
More than \$2.1 billion in contributions from the 48 states, the District of Columbia, Hawaii and Alaska are now on deposit with the federal government in the unemployment trust fund. One of the main criticisms of the compensation plan has been that these reserves were unnecessary—that the plan should be run more on the basis of letting current receipts in the form of payroll taxes take care of the benefits paid out to the temporarily unemployed. Total benefits paid out since the social

security act became effective in January, 1938, have run more than \$1.5 billion. What critics of the plan therefore advocate is a downward revision of the tax so that the reserves would not exceed the collections and benefits by so great a margin.

It must be borne in mind that the \$2 billion reserve is not in one pool that can be drawn on by any or all states. The account of each state is kept separately by the government, which merely acts as administrator and trustee for the states, investing each state's contributions in United States bonds, crediting the interest on those bonds, and making disbursements to the states on demand. Pennsylvania and Ohio, for instance, have reserves of over \$100 million to their credit. Maine has only \$4 million. Similarly, rates of unemployment benefits paid to workers and the length of time they can be paid vary in each state.

**Drain Won't Be Even**  
In considering the unemployment compensation picture nationally, it is impossible to make any accurate estimates of what the drain will be on the reserves in the trust fund. By the best averages which the Social Security Board has been able to make, the average benefits which an individual worker can collect when thrown out of a job is from \$10 to \$11 a week for a period of from 10 to 11 weeks.

If every one of the two million workers who may lose their jobs in this period of readjustment would collect this average \$100, that would mean a \$200 million drain on the reserve fund of \$2.1 billion or less than a 10 per cent reduction. And 90 per cent of the total kitty would still be there.

The trouble with this calculation is that the drain will not come evenly. Industrial states will take the heaviest rap, and some states would normally exhaust their reserves much sooner than others.

Social Security Board's answer to the obvious inequalities and uncertainties of the present systems is that the trouble is not so much with the building up of the big reserve, but with the rates of benefit payments, which it considers too small and not of long enough duration.

"Last year," says SSB Chairman Arthur J. Altmeyer, "over one-half of all the workers receiving benefits were still unemployed when they had exhausted all their benefit rights. In addition, some three million employees of smaller sized firms are entirely excluded from coverage."

From this, it is apparent that the unemployment compensation plan, as now constituted, doesn't do the job it should. That will probably be even

## Good Poultry Is Sure Way to Hike Income

Agent Advises Farmers to Pay Special Attention to Feed

Successful Hempstead county farmer-poultryman pay nearly as much attention to the way they feed their pullets and laying hens as they do to the kind of feeds they provide, reminds Oliver L. Adams, county agent. For one thing, abrupt changes in the diet may cause the birds to go "off feed" and result in lower egg production and slower growth, as will the use of stale feed. If a change in diet must be made, the county agent suggests it be gradual and extended over a period of at least a week or ten days.

Important too, is sufficient hopper space, lest the more timid birds in the flock go hungry. At least 10 linear feet of hopper, with hens eating from both sides, should be provided for 100 laying hens, and a sufficient length of watering trough or number of containers to prevent crowding.

One practice followed by many of the better poultrymen is to provide only a little more feed each day than the birds clean up. The left-overs, if clean and dry, can be mixed thoroughly with the fresh feed in the hoppers. In this way, there will be no accumulation of stale feed at the bottom of the hoppers, reducing likelihood of mold.

Feed mixtures containing fish oil, sources of vitamin A or D, should be bought or mixed in small quantities so that they can be used within 10 days or two weeks.

With egg prices good and prospects bright, Hempstead county farmers will find it to their advantage to provide the right combination of the highest quality feeds, and provide them in a way that will make for maximum growth and egg production.

Winter oats sown for poultry pasture will increase the value of consumed mash and scratch feeds and decrease the cost of production. Green feeds such as oats or high priced substitutes are essential to successful poultry enterprises.

Today's locomotives are 62 per cent faster, have 40 per cent more pulling power and are much more economical with coal than engines of World war times.

more obvious if the end of the defense effort means that the country goes into a long tailspin of depression, and the Treasury has to borrow money to redeem the bonds to meet the heavy demands of the states for their benefit payments.

## Barbs

You can't blame fat people for wanting to change their weights. Sixty thousand dressmakers were locked out in New York. So what? Sew nothing!

face piece.  
There is a chemical filter and a mechanical filter. The mechanical filter strains the air free of dust and toxic smokes. The chemical filter neutralizes or absorbs the gases with a mixture of activated charcoal and soda-lime. The life of the canister in continuous use is approximately 120 hours.

**Musk Can Be Used in 87 Different Ways**  
The three parts of the service mask are interchangeable, and also there are special devices for special uses. Altogether, a soldier can make 87 different combinations in his mask to meet various types of attack or for special needs—quite like a young lady shifting her wardrobe to fit various social events.

A special diaphragm can be screwed into the mouth-piece, permitting a signal corps soldier to continue to talk over an army field telephone even during a gas attack. Special lenses can be screwed into the eye-piece, permitting a soldier on an observation post to continue to look through his binoculars.

Intensive training is given in chemical warfare defense because the war analysts have found that 33 per cent of the American doughboy casualties in the past world war were caused by gas.

Gas is considered a strictly state-made weapon. Chemical warfare officers account for the fact that no reports have been heard of gas use in the current European war by explaining that fighting so far has been moving combat. They believe that the moment the war becomes a giant battle of positions and a deadlock seems to have been reached, gas will be brought into play.

Soldiers in the field are taught how to protect themselves, given demonstrations on how to make their shelters or dugouts near gas-proof by stopping cracks and putting chemically impregnated blankets over the doors. Tests are given a special gas-proof uniform, which covers the entire body and protects against vesicants.

However, the gas-proof clothing is still some distance from perfection—it is very heavy and cumbersome, and is practically air-tight because it is also chemically impregnated. The body "breathes" also to a certain extent and a soldier can't wear the gas-proof uniform more than half an hour at a time, particularly in strenuous exercise.

## GOLF at the PINES

Miniature  
Golf Course

Come out and play this new  
pleasant and healthful  
exercise that you'll enjoy. You  
are invited to spend your  
kind of miniature golf. It's  
leisure time in this beautiful  
park.

Admission Day and Night  
Adults School Age  
15c 10c

Located Next to  
High School Stadium

I'm  
Judy--

"I like Phil because  
he's sensible; Sandy be-  
cause he's fun. What's a  
career girl to do when  
she doesn't know WHAT  
she wants?"

I'm  
Sandy--

"Maybe I am scatter-  
brained, but I can keep  
Judy in the clouds, and  
that's what I'll do if she  
decides to marry an-  
other guy!"

I'm  
Phil--

"I can offer Judy  
wealth, security, and a  
steady, sturdy devotion.  
All I ask is that she come  
down to earth and be a  
little less impetuous."

Their Story--

... is the star-spangled  
romance of the year! You  
may envy Judy her job,  
and the love of two men,  
but not the decision she  
has to make in ...

Bride From  
The Sky

Begins  
MONDAY, Sept. 8  
in  
HOPE STAR

## FRECKLES AND HIS FRIENDS

Accept an invitation for a man without consulting his wishes. Tell a man with a hang-over that he made a fool of himself at last night's party. Open a man's mail, or say, "Who was that?" every time he receives a telephone call. Disapprove of a man's choice of friends in plain language. Openly exchange a man's gift to her. Complain of the food or the prices when a man takes her to dinner in a restaurant. Tell a story that gets its humor from making a man look silly. Tell how hard a man worked to get her—in front of the man.

A freight car today carries about fifty tons, 20 per cent greater than in 1918.

## Do Your Clothes Look Their Best!

## U.S. - Alaska Road Revived

Project Now  
Seen as Vital  
Defense Link

By NEA Service  
SEATTLE, Wash.—The great "hush" secrecy which, in view of the increasing tension in the Far East, surrounds all military and naval work on new bases in Alaska speaks loudly in itself of the need for the oft-proposed U. S.-Alaska motor highway.

This scheme has been discussed, ostensibly from the tourist and goodwill point of view, for more than a decade. But it was only recently that President Roosevelt let it be known that he favored "a real survey" of possible routes with a view to starting actual construction without delay.

Swivel-chair enthusiasts have penciled International Highways on the map as lightly as they pencil a chalk line on a billiard table. But it isn't as easy as that. Flying 20-ton steam shovels by airplane into the Canadian Rockies and keeping hundreds of miles of mountain roads cleared of snow and ice and fallen rock are construction and maintenance requirements which make it impossible really to estimate the cost of such a highway.

That is the opinion of certain high officials of the government of British Columbia, a province which wants the road as a tourist artery and developer of natural resources.

Four Routes From Which to Choose  
Four principal routes are being considered: two from Seattle through British Columbia; one from Chicago through Alberta and thence to British Columbia; one from Chicago through Alberta and down the Mackenzie River valley in the North West Territories.

Cost and construction-time estimates vary widely. A Canadian commission estimates that it would cost \$23,000,000 to build a 20-foot gravel road, without paving, from Vancouver through British Columbia to the Alaska boundary, utilizing existing roads as far as possible—i. e. to Hazelton or Prince George.

Rep. Warren G. Magnuson, of Wash-

ington, chairman of the American Alaska International Highway Committee, concurs in this general estimate and reported recently that Canadian and Alaskan engineers agree that such a road could be built under forced draft within two years.

Rep. Anthony J. Dimond, of Alaska, has introduced a bill in the U. S. House, now in the Committee on Roads, calling for a \$25,000,000 appropriation for an Alaska-U. S. highway.

Previous estimates, however, indicated costs many times greater than this and set from three to 15 years as the time necessary—depending on the route selected. A number of qualified authorities in western Canada go so far as to say that such a road could not be kept open throughout the winter at any price.

Pros and Cons of Proposed Road  
Although various commissions have been "studying" the highway for many years, it is difficult to obtain from official reports satisfactory information about such fundamentals as fog, snowfall, glaciers, avalanches, floods, gradients or per mile cost.

The distances involved in the proposed routes are, roughly: for the two routes from Seattle to Fairbanks via Prince George, Whitehorse, Dawson, 2250 miles; Chicago to Fairbanks via Edmonton and the Mackenzie Valley, 4000 miles; and only a little less from Chicago to Fairbanks via Whitehorse.

On the route northward from Seattle designated "A" there is already a gravel road, with a few stretches of pavement, from Vancouver to Hazelton, B. C., via Prince George. It would have to be extensively relocated, resurfaced and widened before it could be considered safe for military loads, particularly in the Fraser River canyon where it follows the old Cariboo road. In many places the job would be virtually that of constructing a new road. The Vancouver tourist bureau estimates four days required to drive from Vancouver to Hazelton, 832 miles, even when there is no heavy snow.

Supporters of Route B, starting at Prince George, pencil the International Highway along the Rocky Mountain "trench" via Finlay Forks. They point to light, dry snows as easier to remove than those on some U. S. roads. The trench, or valley, is fairly level for 300 miles to Sifton Pass. Beyond that, the gorge for hundreds of miles construction workers would have to notch and blast and bridge innumerable barriers, according to mining engineers who have covered the area.

## More Fatherly Advice

## ARKANSAS

For example, in that country where a road is notched in a mountainside, frost brings dust and gravel down upon the inner surface of the road, and ice and snow solidify this rubble into slippery embankments almost as hard as concrete and sloping toward the precipice at the outer edge of the road. Oldtimers say that it would be suicidal to attempt to drive on such a road in winter.

Stafansson Favors Mackenzie Route  
Route A, from Hazelton, nearer the fjord-indent coast, is even more difficult than the one from Finlay Forks.

One of the few recognized experts who has inspected various proposed

## We, the Women

Only a Wife Would Dare to  
Do Such Things

By RUTH MILLETT  
Only a wife would dare to:  
Critique a man's taste in neckties.

Keep after a man to eat his salad. Make cracks about a man's bald head.

Tell a man he needs a haircut. Say at the end of a good-bye kiss, "Don't forget to pay the telephone bill."

Make fun of a man's old girl friends. Let a man see her wearing cold cream, or with her hair stuck up in curlers.

Tell a man that her new shoes hurt her feet. Critique a man's relatives.

Call a busy man at his office and ask for her.

Say "I told you so" when a man pays no attention to her advice and suffers for it.

Take a bored, oh-yeah attitude toward a man's extravagant compliments.

## 3,800 Places to Look For News Background

NEW YORK—(AP)—Where would you go to get information about the Virgin Islands?

Maybe you didn't know there were 3,800 sources of material on the islands. There are. That many books, articles, and periodicals are listed by the research program of the WPA in "Bibliography of the Virgin Islands," just published by the H. W. Wilson Co.

There are just three of the islands: St. Thomas, St. John, and St. Croix, with an area of 133 square miles. The U. S. bought them from Denmark in 1917 for \$25 million.

## KIDNEYS MUST REMOVE EXCESS ACIDS

Help 15 Miles of Kidney Tubes Flush Out Poisonous Waste

If you have an excess of acids in your blood, your 15 miles of kidney tubes may be overworked. These tiny filters and tubes are working day and night to remove old waste from your system of excess acids and poisonous waste.

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause raging backache, rheumatic pains, leg pains, loss of pep and energy, getting up at night, swelling, puffiness under the eyes, headaches and dizziness. Frequent or scanty passages with smarting and burning sometimes show there is something wrong with your kidneys or bladder.

Kidneys may need help. The same as bowels, so ask your druggist for Doan's Pills, used successfully by millions for over 40 years. They give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.
